Zara Home x Vincent Van Duysen Tactile natural materials in timeless forms define **Zara Home's** new collection in collaboration with Belgian architect and designer **Vincent Van Duysen** (pictured). "This project is deeply personal," says Vincent. "It represents a distillation of my own design DNA — everything I've come to stand for in design over the last 30 years." The furniture, rugs, table lamps and other items reflect a desire to create soulful pieces that age beautifully. "It's intended to complement your space, without defining it.
